

3: The Food Served is not Recommended for Children of the Given Age Group

Last Modified on 03/05/2019 10:36 am CST

When you set up foods in Minute Menu HX, you can indicate which foods are not appropriate for children under 1 year old. You can also indicate which foods are for infants, specifically. We can configure these foods so the system warns or disallows the given food if it is served to a child in the wrong age group.

This error is generated when providers serve a food that is allowable for a child in a given age group, but is not recommended. It does not disallow the food component or the meal.

Contact Minute Menu Support if you need to change the way your agency handles this particular error for any given food.
