

22: Meals were Claimed on Dates that Fell After this Provider's CACFP Agreement Expired. Verify Provider's Yearly CACFP Application

Last Modified on 03/05/2019 12:41 pm CST

Minute Menu HX allows you to store an annual provider contract expiration date for each of your providers. This date is not related to license or tiering, but it is used in some states when provider contract renewals (with their sponsors) are checked regularly.

If you use this feature, enter a date in the Current CACFP Expiration box in the Provider Information General tab. This error is generated if the date entered in this box has passed or if there is no date entered in this box.

You can configure this error to disallow all meals served on the dates that fall after this date, warn for a period of months and then disallow all meals, or you can disable this error so it is not generated. You can also disable the Current CACFP Expiration box if you do not even store the date in provider files.
