24: Meals were Claimed on Dates that Fall Before this Provider's License Start Date

Last Modified on 03/05/2019 1:01 pm CST

Minute Menu HX stores child care licensing start and end dates in the Start Date and End Date boxes in the Provider Information Licensing tab. Your state's licensing agency may supply a start date, end date, or neither date. If they are not provided by the state, you must typically enter some kind of value into these boxes, such as 1/1/1950 for a start date and 12/31/2050 for an end date.

This error is generated when the license start date has not yet been reached. You can configure this error to to disallow all meals on days prior to the license start date, or you can configure it to generate a warning. You can also disable this error.
