

25: Meals were Claimed on Dates that Fall After this Provider's license End Date. Verify License Re-Application

Last Modified on 03/05/2019 1:16 pm CST

Minute Menu HX stores child care licensing start and end dates in the Start Date and End Date boxes in the Provider Information Licensing tab. Your state's licensing agency may supply a start date, end date, or neither date. If they are not provided by the state, you must typically enter some kind of value into these boxes, such as 1/1/1950 for a start date and 12/31/2050 for an end date.

This error is generated when the license end date has passed. This error can be configured to disallow all meals served on dates after the license end date, generate a warning for a few months and then disallow meals, or it can be ignored.
