

29: Meals were Claimed on a Holiday

Last Modified on 03/05/2019 1:39 pm CST

This error is generated when a provider claims a meal on a holiday, and there is no indication that the provider was open on that holiday (per the Provider Calendar). This error disallows, warns, or ignores meals claimed on a holiday (unless you have set the error to allow providers to claim on holidays for which they have indicated they are open).

Sponsors set up specific holidays in the Sponsor Calendar window. Providers can indicate they are open for business on these holidays in the Provider Calendar in KidKare, or on their monthly CIF (which you, the sponsor, then record in the Provider Calendar in Minute Menu HX).

This edit check can also be performed at the level of individual children.
