

# 46: A Pending (or Unknown) Status Child was Claimed

Last Modified on 03/06/2019 10:58 am CST

This error is generated when a pending child is claimed. This error always disallows the child.

Children enrolled in KidKare remain at a Pending status until you use the Activate New Children function to activate them. You can also manually set children to Pending if you do not have a valid, signed enrollment form for them. If you receive this error, check the child's status and activate them, if appropriate. Then, re-process the claim.
