47: A Child was Recorded on the Wrong Scannable Menu Form (Infant vs Regular Menu)

Last Modified on 03/08/2019 12:07 pm CST

The Infant Menu is intended for all children under one (1) as of the given meal date. The Regular Menu should be used when recording children ages one (1) and up, as of the given meal date.

This error is generated when a child is recorded incorrectly, based on the child's age. This frequently occurs when an infant turns 1 during a given month, so the provider may mistakenly record the non-infant child on the Infant Menu, as well as offer the wrong meal pattern to the child. Unlike **Error 126** , this error is always a disallowance.

> **Note:** Special Diet infants may be claimed on the Regular Menu. If this is the case, this error will not generate. For more information, see **Error 145** .
