

55: A Dinner was Claimed without Dinner Documentation on File for the Provider

Last Modified on 03/06/2019 1:05 pm CST

Some states require specific, signed statements from providers that serve Dinners. To indicate that the provider serves Dinner and that you have a statement on file, check the Dinner box in the Documentation on File section of the Provider Information Other tab.

This error is generated if a provider serves a Dinner but does not have a statement on file in Minute Menu HX in the Provider Information Other tab. This error warns or disallows the meals.
