

60: An Invalid Master Menu Number was Recorded on the Scannable Menu

Last Modified on 03/06/2019 1:27 pm CST

If a provider marks the Master Menu bubble (M) on a scannable form, they must provide a valid Mater Menu number in the lowest Fruit/Vegetable row for that meal. For more information about Master Menus, see [Master Menus](#) .

This error is generated if the number entered on that row does not correspond to a Master Menu plan in the system. It warns, disallows, or ignores the effected meals.
