72: The Meal was Indicated as a Mater Menu on the Scannable Form, but No Master Menu Number was Bubbled In

Last Modified on 03/06/2019 2:19 pm CST

If a provider marks the Master Menu bubble (M) on a scannable form, they must provide a valid Mater Menu number in the lowest Fruit/Vegetable row for that meal. For more information about Master Menus, see **Master Menus** .

This error is generated if the provider does not enter a master menu number at all. It warns, disallows, or ignores the effected meals.
