

76: A Meal was Served in Which the Provider's Own Children Were the Only Known Children Served

Last Modified on 03/06/2019 3:25 pm CST

Food Program rules require that a provider must serve at least one child who is not their own during a meal. This error is generated if the provider only serves their own children during a meal. It disallows the entire meal.

In some cases, a day care child may be marked in attendance at a meal with the provider's child, and the day care child is disallowed for another limit (example: the child exceeds the 2 + 1 limit for the day). The processor can be configured to look at the disallowed day care child, so the provider's own child is not disallowed since the day care child was present, or it can be configured to ignore the disallowed day care child, which would disallow the provider's own child.
