

85: Provider Over Capacity, but Approved for Single Column Serving Overlap on Scannable Form. Verify Provider Capacity

Last Modified on 03/07/2019 9:25 am CST

Minute Menu HX handles split-shift checking in two ways: Providers mark a first and second shift on scannable forms/KidKare independently, or they mark all children in capacity at both shifts, but mark only a single serving. The latter case is referred to as a single-column overlap. You must set up Overlap Capacity in the Provider Information Other tab for each split-shift meal.

This error is generated when a provider is over their Overlap Capacity. This error is always a warning.
