

91: School Aged Child Served a Meal When Child Should have Been in School

Last Modified on 03/07/2019 10:51 am CST

This error is generated when a school aged child is served an AM Snack or Lunch (and, in some cases, Breakfast) on a school day. This error is ignored on weekend and on any day you or the provider indicates that school was closed or the child was home sick.

Notes: School closures can be noted on the School District Calendar or Sponsor Calendar, and child illness can be noted on the Child Calendar. When you print the Claimed Foods & Attendance report, children who are out of school or sick are noted with an *s* or *i* for the given date.

If a child has specific school days within the week (as marked in the School Attend Days section of the Child Information Schedule tab), this error is ignored on those days of the week the child does not attend school. It can ignore, warn, or disallow the affected child.

If a child is determined to be school-aged based on your state's capacity regulations, the child may be subjected to this edit check (assuming your agency performs this check). However, even if a child is assumed to be school aged from a capacity standpoint, a child is only subjected to this check if their Grade Level/School Type (Child Information Schedule tab) as follows:

- **During Lunch, these children are checked:**
 - S (School Aged)
 - K (Kindergarten/All Day Kindergarten)
 - L (All Day Headstart)
- **During AM Snack (and possibly Breakfast), these children are**

checked:

- S (School Aged)
- K (Kindergarten/All Day Kindergarten)
- L (All Day Headstart)
- A (AM Kindergarten)
- D (AM Headstart)

Note that this specifically excludes children designated as Year Round School, Home School, or No School. Consult the child's school designation in the Child Information Schedule tab.
