

# 97-106: Provider was Over Capacity

Last Modified on 03/07/2019 11:48 am CST

One or a combination of these errors are generated if a provider records some combination of children that violates their license capacity, as noted in the Provider Information Licensing tab. Capacity errors can disallow the number of children that are over capacity, disallow the entire meal, issue a warning, or ignore the situation.

**Note:** If a waiver is in effect, the over capacity children will be allowed.
