120: Child File Indicates Child Arrived After Meal was Served or Left Before Meal was Served

Last Modified on 03/07/2019 1:41 pm CST

Some sponsors cross-check meal times with a child's enrollment schedule. This error is generated if the meal is served at a time the child's file indicates the child is not in care (based on the following: drop-off/pick-up times, weekend drop-off/pick-up times, and school departure/return times). It may warn or disallow the affected child.

Check the Child Information Schedule tab and compare the actual meal time (in the Examine Meal History window) for KidKare claims or the provider's approved meal times in the Provider Information Meals tab for paper claims (scanning or direct entry). Pay special attention to AM/PM problems.

Meal duration recorded in KidKare is assumed based on the time preferences found in the Sponsor Preferences window. For paper claims, examine the start.ending times supplied in the Provider Information Meals tab. If no end times are supplied, the duration is assumed based on the sponsor preferences.

Child school departure/return times are accounted for only if school is in session for the child on the given day (they are ignored if school is out). The system assumes school is in-session based on the child's daily school schedule and when no school out or child illness calendar information has been entered into the system.

Note: If daily In/Out times are available (via KidKare or scannable In/Out forms), they take precedence over the child's enrollment form information.
