123: The Same Meal Date was Marked in Two Different Columns on the Scannable Forms. This Column(s) Attendance Has Been Disallowed

Last Modified on 03/07/2019 2:13 pm CST

When filling out scannable menus, providers must supply the day to which all meals in the given column apply. In some cases, they are allowed to supply the same day more than once, such as: split servings/shifts (a meal is served more than once to different groups of children), or children in different child groups (based on the 1-32 child numbers) served in the same meals. If these exceptions do not apply to the provider, the same day cannot be marked more than once.

This error is generated when the same day is marked more than once on a scannable form. You can typically prevent this error if you correct it during the forms validation process. If you do not correct it during forms validation but still wish to correct the provider's mistake, you must first find the column where the provider made the mistake. Usually, they will have written the correct day number but bubbled the incorrect bubble. Then, re-scan the form and process the claim again.

When this error is generated, each duplication is disallowed after the first occurrence of the day.
