

125: No Attendance (In/Out) Times on File

Last Modified on 03/07/2019 2:26 pm CST

Some sponsors must obtain daily attendance (In/Out) time information for all of their children. This error is generated if this information is cross-checked against each meal's time of serving and no time information is on file for any children on a day that meals were served. It always disallows meals for the affected day.

If you see this error, make sure that you have scanned all In/Out forms, or make sure that the provider supplied the daily attendance (In/Out) times. You can check this information in the Record Full Attendance by Child window.
