

126: Child Claimed on Both Regular and Infant Meals

Last Modified on 03/07/2019 2:31 pm CST

This error is generated when the same child is mistakenly marked on both the Infant Menu and Regular Menu. The child is actually processed as if they were recorded on the first of the two scanned menus without duplication, but the second menu encountered is ignored.

As a result, this error is immaterial if the child is an infant, as you scan Infant Menus first, and this error is generated because the child was also marked on the Regular Menu, which is scanned after the Infant Menu. If the child is not an infant, you must white-out the child's mark on the Infant menu and re-scan the provider's claim.
