

147: Provider Over Capacity Without Overlap

Last Modified on 03/07/2019 4:08 pm CST

Minute Menu HX handles split-shift checking in two ways: Providers mark a first and second shift on scannable forms/KidKare independently, or they mark all children in capacity at both shifts, but mark only a single serving. The latter case is referred to as a single-column overlap. You must set up Overlap Capacity in the Provider Information Other tab for each split-shift meal.

This error is generated when overlap capacity is used, and the provider is over their normal capacity but not over their overlap capacity. This is a warning, and you can configure Minute Menu HX to ignore the situation.
