

155: Children were Not Claimed but Should Have Been Based Upon Their Enrollment or Daily In/Out Time Information. Those Children are Listed Here for Information Purposes Only

Last Modified on 03/07/2019 4:58 pm CST

This error can be generated if you have chosen to process capacity two times for each meal claimed. It is a warning message only. The first check is the normal capacity check. A second capacity check can be performed with Minute Menu HX.

This second check assumes that children are in attendance, even if they aren't claimed at this specific meal serving, if they were claimed at other meals or servings for split shifts that day and their enrollment form data indicates that they should have been claimed at this meal.

Normally, if this second capacity check is done, you are given certain over capacity messages related to the *second* capacity check in the event that adding this extra children back would result in an over-capacity situation.

This warning message also generates a list of all children that were added back to the meal—even if doing so doesn't result in over-capacity. As a result, this error is usually only enabled to assist in analyzing very specific over-capacity situations.
