161: Child File Indicates the Child Doesn't Normally Attend Day of Week, but Days Vary is Indicated

Last Modified on 03/08/2019 12:46 pm CST

Minute Menu HX can check a child's weekly schedule (by day of the week) and disallow or warn the child if they aren't enrolled for that day (see **Error 109**). You can further configure this error so that the Days Vary box (Child Information Schedule tab) can be referenced, and, if it is checked, the child can still be claimed.

This error is generated if you do not allow Minute Menu HX to reference the Days Vary box to exempt the child from individual day-of-week checks.
