

Error Codes 140-147

Last Modified on 04/26/2019 2:55 pm CDT

Error 140

Provider was Over Capacity for Non-School Aged Related Children

Provider-related children are counted with a distinct maximum capacity in New Mexico and a few other states. This error is generated if provider-related children are over capacity.

Error 141

Provider was Over Capacity for Not for Pay Children

Not-for-pay children (usually children related to the provider) are counted with a distinct maximum capacity in Georgia (and possibly other states). This error is generated if the provider's not-for-pay children are over capacity.

Children are noted as Not for Pay in the Pay Source field in the Child information Special tab.

Error 142

Provider Served Meal at Time outside of Approved Time Range

Your agency can set up providers to serve meals only within approved time ranges. You can set this up for all providers, or you can apply it to specific providers. This error is generated when a provider records a meal outside of the approved time range. It warns or disallows affected meals.

When researching this error, review the Examine Meal History window for

KidKare providers, or check the Provider Information Meals tab for direct entry/scannable claim providers. Pay special attention to AM/PM discrepancies.

Error 143

Insufficient Time was Allowed Before/After this Meal and the Previous/Next Meal (Infants Ignored)

Some agencies want to ensure that meals and snacks are served within certain times of each other, typically two (2) or three (3) hours. You can configure Minute Menu HX to check minimum times between meals, based on your policies. This error is generated if a provider serves a meal too close to another meal. It warns or disallows the meal.

For providers who use scannable forms, this error checks the times entered in the Provider Information Meals tab. For providers who use KidKare and In/Out forms, the actual supplied meal times are checked instead. When researching this error, check the Examine Meal History window for KidKare claims, and check Provider Information for paper claims (direct entry or scannable claims). Pay special attention to AM/PM discrepancies.

Error 144

Meal Claimed When Monitor Noted the Provider was not Home

This error is generated if a Monitor noted a provider was not home on a review, but the provider claimed meals for this date. This is a warning. Consult the provider's review history in the Provider Reviews window.

Error 145

A 6-11 Month Old Special Diet Infant was Served on the Regular Menu. Verify Special Diet Appropriate for Table Foods

This error is generated if a child designated with a special diet is claimed on a regular menu when the child is 6-11 months old. Consult the Special Diet Description box in the Child Information Special tab.

How would you rate this article?

Error 146

Private Child(ren) Claimed When no Day Care Children Present

Children with a Private Pay Source (Not for Pay) cannot be claimed when no other children are present, based on licensing regulations in Georgia and some other states. This error is generated if this is the case for your state. It is a disallowance or a warning.

Error 147

Provider Over Capacity Without Overlap

Minute Menu HX handles split-shift checking in two ways: Providers mark a first and second shift on scannable forms/KidKare independently, or they mark all children in capacity at both shifts, but mark only a single serving. The latter case is referred to as a single-column overlap. You must set up Overlap Capacity in the Provider Information Other tab for each split-shift meal.

This error is generated when overlap capacity is used, and the provider is over their normal capacity but not over their overlap capacity. This is a warning, and you can configure Minute Menu HX to ignore the situation.
